局部语法与系统功能语法的互补性初探*

——以评价子语言为例

董 敏

(北京航空航天大学外国语学院,北京 100191)

摘 要:系统功能语言学和语料库语言学都关注使用中的语言,在语境、词汇-语法、系统-语篇、频率-概率等方面存在一定的对话空间。本研究聚焦评价子语言,探讨语料库驱动的局部语法与系统功能语法理论的互补性。局部语法聚焦功能受限的子语言,以词汇-型式组合体为单位,描写功能成分与型式成分之间的匹配。研究发现,评价局部语法对显性的评价形式做出了可靠的识别、功能分析和量化描写,进一步验证和发展了评价理论的态度系统,与评价词汇为中心的方法形成了有益的补充。此外,与系统功能语法的语域模型、及物语法构型和语言整体的聚合系统相比,局部语法主张水平方向和垂直方向交织的共现语境观,构建词汇-型式组合体的局部语法构型,观察特定功能子语言的共现语篇和互文语篇,二者具有明显的互补性。这表明局部语法可以搭建语料库语言学与系统功能语言学进一步对话的桥梁,推动二者在语言意义的研究中实现进一步融合。

关键词:局部语法;系统功能语法;词汇-型式组合体;评价局部语法;评价理论

1. 引言

系统功能语言学和语料库语言学都主张在社会文化语境下探讨形式选择与意义实现,都关注语境、词汇语法不可分性、聚合—组合关系以及相对频率的计算,但既有区别又有联系,存在鲜明的互补性。前者认为语境是与语言元功能形成双向适配关系的语言之外的社会文化语境;语法与词汇形成一个连续体,语法特征的终端是词汇项目,词汇是"最精密"的语法;从聚合关系出发,组合关系是第二位的,通过描写组合结构的语法构型,分析聚合系统意义潜势中其它选择的可能性,从而根据社会文化语境解释选择该措辞的动因;统计系统网络的抽象范畴的出现频率,一般从小句入手人工赋码小型的语料库。后者主张语境是上下文和互文语篇组成的语言之内的共现语篇;词汇与语法共选,词汇驱动语法,语法结构是依赖词汇的形式意义复合体;语言的整体指已经实现的措辞的集合,组合关系和聚合关系同时构成实际发生的共现和复现语篇,在语料库中观察出现的频率;检索字母串或者多词序列的出现频率,通常使用大型的干净文本库。显然,系统功能语言学倾向于"从理论到观察",具有理论优势,解释力强,语料库语言学则倾向于"从观察到理论",具有方法优势和技术优势,善于提供有力的语言证据支持。

语料库驱动的研究是发展和检验理论主张的有效出发点和可靠基点，基于大型干净文本库的观察和发现，可以验证、调整和发展系统功能语言学的相关理论观点（Tucker，2001：212；Butler，2004：147）。系统功能学者利用更加精细的语料库数据，对及物过程和参与者、评价理论、名词化和语法隐喻、以及主位－述位结构做出了更加复杂的理论阐释。（Martinez，2001；Flowerdew，2008；Teich & Holtz，2009；Holmes & Nesi，2009；Thompson，2015；Bednarek，2010；Coffin & O'Halloran，2005，2006；Južnič，2012；Yang，2013；Williams，2006）

局部语法（local grammar）在语料库语言学和系统功能语言学的交汇点——型式语法的基础上（pattern grammar，Hunston & Francis，2000；Teubert，2009：82；Butler，2004：158－160），从语言实例出发，聚焦功能受限子语言（functionally-restricted sublanguage，Hunston & Sinclair，2000：77），基于词汇－型式组合体（word-pattern combination）的功能结构，进行功能成分与型式成分之间的匹配，对型式与意义之间非一一对应的关系做出连贯的功能语法分析。本文以评价子语言为例，论述评价局部语法在评价观、评价分析方法和分析工具等方面与评价理论的互补性，以及对评价理论的检验、调整和发展。以此为基础，从语境、词汇语法关系和聚合—组合关系三个方面探讨局部语法与系统功能语法的互补性，从而论证语料库语言学与系统功能语言学虽然存在对话障碍，但局部语法研究可进一步增强二者对话的基础，扩大二者融合的空间，共同推动语言使用的意义研究。

2. 局部语法

局部语法关注特定领域的意义而非整个语言系统的意义（Hunston，2002：178；Bednarek，2008：66），如定义语言（Barnbrook，2002）、评价语言（Hunston & Sinclair，2000；Hunston，2003；Bednarek，2008；Su，2015）、因果关系语言（Allen，2005）、免责声明语言（Cheng & Ching，2016）、搭配框架（Warren & Leung，2016）以及请求语言（Su，2017），其扩展和累积便构成描写语言学。其特点在于从语言使用的角度，通过型式描写、意义（功能成分）分析和交际语境阐释，分析形式与意义之间的对应关系，本质上是一种功能语法分析方法。本节以评价子语言为例，论述局部语法的操作框架和方法论。

首先，利用语料库方法抽取和识别尽可能多的语言使用实例，有利于实现分析的穷尽性。Hunston 和 Sinclair（2000）以及 Hunston（2003）利用 Bank of English 通用语料库识别实施评价功能的句子，Bednarek（2008）利用会话、新闻报道、小说和学术话语四个子库组成的通用语料库抽取表达情感评价的句子，Su（2015）利用 BNC 传记子库（CoB）抽取人物行为和品格评价的实例。

其次，识别与子语言功能相关的语言成分，实现分析的全面性。语言使用具有短语学倾向，以短语学序列为出发点识别连续文本中的意义单位，有利于实现词汇－型式组合体的全面性描写和相关语篇实例的穷尽性分析（Hunston，2003）。型式是局部语法必不可少的核心成分，语法型式而不是孤立的词汇是识别意义单位和构建局部语法的更为可靠、更易操作的出发点（Hunston，2002：181；Hunston，2011：150）。Bednarek（2008）以 15 个高频的情感词汇项目为描写出发点全面概括了动词、名词、形容词等主要词类的情感评价型式。

(C)1994-2022 China Academic Journal Electronic Publishing House. All rights reserved. http://www.cnki.net

Hunston 和 Sinclair(2000)、Hunston (2003) 和 Su (2015) 分别描写了 6 种、18 种和 10 种高频的情感评价和行为/品格评价的形容词型式。

再次,确定子语言的特定功能成分。局部语法的亮点之一是分配更加透明更加可靠的功能范畴(Hunston & Sinclair,2000: 79; Butler,2004: 158; Bednarek,2008: 66, 72; Hunston,2011: 142),描写型式成分的语义标签直接指向该子语言所特有的话语功能,具有透明性和专一性(Bednarek,2007: 4)。围绕评价语境中的评价对象、评价范畴和评价触发项三大基本要素,Hunston 和 Sinclair (2000) 确定了 Thing Evaluated、Evaluative Category、Evaluating Response、Evaluator、Hinge 及 Restriction on Evaluation 等评价功能范畴,构建了事物评价局部语法(local grammar of Evaluation)。Hunston(2003) 和 Bednarek(2008) 基于评价理论的情感子系统,借鉴 FrameNet 的语义框架描写方法 (Fillmore & Atkins,1992),确定了 Experiencer/Emoter、Emotion、Cause/ Trigger、Empathy-target/ Third party、Action/ Phenomenon 及 Expressor 等功能成分,构建了情感局部语法(local grammar of Affect)。Su(2015) 确定了 Target, Evaluator、Judgment、Scope、Action、Reason、Patient 及 Hinge 等功能成分,构造了判断局部语法(local grammar of Judgment)。

最后,基于频数,对所有高频的词汇-型式组合体进行功能成分与型式成分的匹配,确保分析的全面性(Hunston,2003: 348)。事物评价局部语法框架完全置于评价功能的语境中,有利于显化评价对象、评价范畴等功能成分对实施评价行为的共选关系,对评价子语言做出了连贯的一致的功能语法描写。

1) This book is interesting to read.

功能 / 型式	Thing evaluated	Hinge	Evaluative category	Restriction on evaluation
link verb + adjective group + *to*-infinitive clause	noun group	link verb	adjective group	*to*-inf clause
	This book	is	interesting	to read

2) Doctors were optimistic that he would make a full recovery.

功能 / 型式	Evaluator	Hinge	Evaluating response	Thing evaluated
link verb + adjective group + *that*-clause	noun group	link verb	adjective group	*that*-clause
	Doctors	were	optimistic	that he would make a full recovery

情感局部语法分析表明,同一型式与不同的词汇共现,同一词汇与不同的型式共现,均可建构不同的情感语法构型;反之,同一词类的不同型式,以及不同词类与相同语法范畴共现的不同型式,均可建构相同的情感语法构型。由此可见,功能成分与型式成分之间存在非一一对应的关系,其匹配取决于词汇-型式组合体;型式与意义相关联,是一种短语学形义复合体。

3) You've got to be very thankful to win once.

They were puzzled to find the kitchen door unlocked.

功能 / 型式	Experiencer		Emotion	Action
	noun group	link verb	adjective group	clause
ADJ *to*-inf.	you	've got to be	very thankful to	win once

(C)1994-2022 China Academic Journal Electronic Publishing House. All rights reserved. http://www.cnki.net

功能 / 型式	Experiencer		Emotion	Phenomenon
	noun group	link verb	adjective group	clause
ADJ *to*-inf.	they	were	puzzled to	find the kitchen door unlocked

4) I was angry with my landlord.

Haig was angry at being declined the offer.

功能 / 型式	Experiencer		Emotion	Third party
	noun group	link verb	adjective group	noun group
ADJ *with*	I	was	angry with	my landlord

功能 / 型式	Experiencer		Emotion	Cause
	noun group	link verb	adjective group	clause
ADJ *at*	Haig	was	angry at	being declined the offer

5) It makes me sick that anybody should doubt my commitment.

It makes me sad to see all the god work we have done devalued in this way.

功能 / 型式		Experiencer	Emotion	Phenomenon
	it verb	noun group	adjective group	clause
It v n ADJ *that*-cl	it makes	me	sick that	anybody should doubt my commitment

功能 / 型式		Experiencer	Emotion	Phenomenon
	it verb	noun group	adjective group	clause
It v n ADJ *to*-inf	it makes	me	sad to	see all the god work we have done devalued in this way

6) The people are terrified that they might be killed.

I hate that I have caused her so much pain.

. . . the astonishment that so many hotels border on Fawlty towers.

功能 / 型式	Emoter		Emotion	Trigger
ADJ *that*-cl	people	are	terrified that	they might be killed
V *that-cl*	I		hate that	I have caused her so much pain
N *that-cl*			the astonishment that	so many hotels border on Fawlty towers

判断局部语法结合语料库数据，探讨了判断型式与判断局部语法构型之间的关联：Target + Hinge + Judgment + Scope **多由** ADJ *at*、ADJ *in*、ADJ *about*、ADJ *of* **和** ADJ *that*-cl **等型式实现，**Target + Hinge + Judgment + Reason **基本上由** ADJ *for* **实现，**Target + Hinge + Judgment + Patient **多由** ADJ *towards*，ADJ *with* **和** ADJ *to* **等型式实现，**Target + Hinge + Judgment + Action **基本上由** ADJ *to*-inf **实现。**

7) I was good at making deals.

I became cunning in finding way of being popular with the press.

(C)1994-2022 China Academic Journal Electronic Publishing House. All rights reserved. http://www.cnki.net

功能 / 型式	Target/Evaluator	Hinge	Judgment: Capacity	Scope
	Noun group	Link verb	Adjective group	clause
ADJ *at*	I	was	good at	making deals

功能 / 型式	Target/Evaluator	Hinge	Judgment: Veracity	Scope
	Noun group	Link verb	Adjective group	clause
ADJ *in*	I	became	cunning in	finding ways of being popular with the press

8) She was famous for her witty outrageous remarks.

He was good with his students.

He remained loyal to his friends.

Hardy was often thoughtful for the traveler.

功能 / 型式	Target	Hinge	Judgment: Normality	Reason
	Noun group	Link verb	Adjective group	Noun group
ADJ *for*	she	was	famous for	her witty outrageous remarks

功能 / 型式	Target	Hinge	Judgment: Propriety	Patient
	Noun group	Link verb	Adjective group	Noun group
ADJ *with*	he	was	good with	his students

功能 / 型式	Target	Hinge	Judgment: Tenacity	Patient
	Noun group	Link verb	Adjective group	Noun group
ADJ *to*	he	remained	loyal to	his friends

功能 / 型式	Target	Hinge	Judgment: Emotivity	Patient
	Noun group	Link verb	Adjective group	Noun group
ADJ *for*	Hardy	was	often thoughtful for	the traveler

3. 评价局部语法与评价理论的互补性

评价立足于语篇层面，依赖语境，拥有大量的表达手段，弥漫于所有自然发生的语言（Hunston，2011：12－19）。评价理论（Appraisal Theory，Martin & White，2005）构建语篇层面的态度、介入和级差等评价意义系统，扩展人际功能的语篇语义学研究，注重主体间立场互动的探讨，是系统功能语言学最重要的新发展之一（房红梅，2014：306－307）。在方法论上，评价理论以词汇语法层的评价词汇为中心，鲜有研究探讨情感等评价意义的语法结构资源。（刘世铸，2009）

评价局部语法视评价为一种话语功能（Hunston & Sinclair，2000），认为孤立的词汇只具有意义潜势而不是意义（Hanks，2013：65），表达评价意义的词汇项目在数量上没有限制（Hunston，2004：157），评价的准确所指更多地取决于型式而不是形容词自身（Hunston，2003：353；Hunston & Sinclair，2000：96）。显然，整体上看，评价局部语法基于词汇－型式组

(C)1994-2022 China Academic Journal Electronic Publishing House. All rights reserved. http://www.cnki.net

合体的描写框架，对评价理论以评价词汇为中心的描写方法形成有益补充，进一步检验和发展了评价理论，显化了评价词汇、评价语法和语篇评价意义之间的内在关联。

评价局部语法利用语料库方法，基于评价功能子语言的词汇－型式组合体，对显性的评价形式作出了可靠的识别、功能分析和量化描写，发展了评价理论提出的“铭记评价”（attitudinal inscription）范畴。多种高频的情感评价型式和判断评价型式构建的情感局部语法构型和判断局部语法构型，验证了评价理论区分情感和判断两种态度意义的合理性。Su（2015）利用 BNC 语料库，探讨了所有形容词型式（Francis et al.，1998）在情感、判断、鉴赏三大态度系统的分布，表明形容词型式可以区分感情（Emotion）和观点（Opinion）两大宏观的态度意义（Bednarek，2009；Hunston，2011：142），并且诊断判断和鉴赏两种子观点态度意义。如下表所示：

表 1　形容词型式与三大态度子系统的关联（参见 Su，2015：237－241）

情感子系统	ADJ wh、*it* v n ADJ *that*、*it* v n ADJ to-inf
判断子系统	ADJ *that*、ADJ-ing、ADJ *about*、ADJ *as to* wh、ADJ *at*、ADJ *towards*、*it* v-link ADJ *of* n *that*、*it* v n *as* ADJ *that*、*it* v-link ADJ *of* n to-inf
鉴赏子系统	ADJ *between* pl-n、*what* v-link ADJ v-link wh、*what* v-link ADJ v-link-ing、*what* v-link ADJ to-inf v-link *that*/wh、*what* v-link ADJ *to* n v-link *that*/wh、*what* v-link ADJ *in* n v-link *that*/wh

其次，评价局部语法根据语料库数据，对态度子系统进行了适当修整，更加符合评价子语言使用的现实，更易于操作。Bednarek（2008）基于情感局部语法构型和语料库数据，不仅增加了 surprise、dis/inclination 两个新的情感类型，而且从拓扑学（topology）视角拓展了情感空间，提出包括 un/happiness，in/security 和 dis/satisfaction 三个“核心情感类型”（Martin & White，2005：49）在内的所有情感类型形成一个情感连续体，更加符合人们情感体验的心理现实。如下图所示（Bednarek，2008：172）：

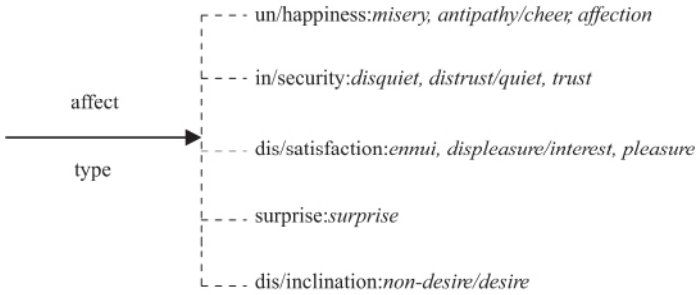

图 1　修整的情感子系统

Su（2015）结合词汇学方法的人格心理学研究（如 Johnson-Laird & Oatley，1989）和语料库数据，增加了评判人的性格情感类型的新的判断范畴 Emotivity，从行为评价/品格评价和社会尊重/社会制裁两个维度修整了判断子系统。这验证了评价理论关于判断评价的假设——既建构与人类行为相关的态度，参照社会可接受性或者社会规范同意或者不同意某种人类行为，又评判人的品格，判断一个人在多大程度上达到了社会期望的要求。（White，2011：22－23）

(C)1994-2022 China Academic Journal Electronic Publishing House. All rights reserved.　http://www.cnki.net

表2 修整的判断子系统(Su,2015:78)

	行为评价	品格评价
社会尊重	**Normality**: uniqueness e. g. *luck to-inf.*, *famous for*, *notable for*, etc.	**Tenacity**: dependability e. g. *careful to-inf.*, *brave about*, etc.
	Capacity: ability e. g. *good at*, *adept at*, *capable of*, etc.	**Emotivity**: emotional types of personal traits e. g. *confident of*, *complacent in*, *shy about*, etc.
社会制裁	**Propriety**: appropriateness e. g. *good to*, *generous of*, *rude to*, *short on*, etc.	**Veracity**: truthfulness e. g. *frank about*, *true to*, *honest about*, etc.

4. 局部语法与系统功能语法的互补性

评价理论是基于系统功能语法理论对语篇评价系统的研究,旨在规划出人际意义的语篇模式,不是对传统系统功能研究的革命,甚至没有超越系统功能语言学的基本理论框架(Martin,2010:143)。上述评价局部语法对评价理论的有益补充可以折射出局部语法与系统功能语法的互补性,包括语境、词汇语法关系及聚合—组合关系三个方面。

4.1 语境

系统功能语法根据概念、人际和语篇三大元功能与话语范围、话语基调和话语方式三大情景语境变量之间的双向适配关系,构建了语域模型,有力阐释了语篇与社会文化语境之间的关联。局部语法在建构特定功能子语言局部语法构型的基础上,也尝试探讨语域变异问题,Bednarek(2006;2007)是代表性研究。具体来说,英国大报和小报使用形容词评价型式和一般名词评价型式的频率相当,这表明从话语范围看,两种报刊均报道硬新闻,基本上谈及相同的报道源;然而二者使用感情评价形容词型式和心理评价形容词型式的频率存在显著差异,与之匹配的评价功能范畴存在显著差异——大报多使用"评价范畴",小报多使用"评价反应",这表明从话语基调看,大报直接报道其自身对新闻事件的评价,而小报倾向于谈论各方对该新闻事件的情感反应或者心理反应,某种程度上验证了大报的"quality"特性和小报的"popular"特性。由此可见,局部语法坚持的组合轴和聚合轴交织的言内语境观,同样突出语言对社会文化语境的反作用,与语域模型形成有益补充。

4.2 词汇语法关系

与系统功能语法相似,局部语法也关注使用中的语言,也认为"形式即意义",但二者的分析框架明显互补。前者以描写整个语言系统的元功能范畴和语法构型作为分析工具,动词、形容词及搭配和多词序列的结构分析和系统网络的构建都是以及物语法构型为出发点(Hasan,1987;Matthiessen,1995;Tucker,2005)。后者根据频数、词汇和语法结构的依存关系以及意义特征,以词汇-型式组合体为分析单位,聚焦组合结构,而对结构角色不做描写,功能范畴完全置于子语言的局部功能语境中,是一种词汇驱动的功能语法分析方法。就上述实例而言,事物评价局部语法的两个例句分别为属性关系过程和情感心理过程;情感局部语法的8个例句均为情感心理过程;判断局部语法的6个例句均为属性关系过程,两种功能语法分析方法的互补性如以下三个实例的分析所示:

This book is interesting to read.

(C)1994-2022 China Academic Journal Electronic Publishing House. All rights reserved. http://www.cnki.net

功能 / 型式	Thing evaluated	Hinge	Evaluative category	Restriction on evaluation
link verb + adjective group + *to*-infinitive clause	noun group	link verb	adjective group	*to*-inf clause
	This book	is	interesting	to read

Carrier	Relational Process: Intensive	Attribute: Impact
This book	is	interesting to read

It makes me sick that anybody should doubt my commitment.

功能 / 型式		Experiencer	Emotion	Phenomenon
	it verb	noun group	adjective group	clause
It v n ADJ *that*-cl	it makes	me	sick that	anybody should doubt my commitment

Senser	Mental Process: Affect: Dissatisfaction	Phenomenon
me	makes sick	It/ that anybody should doubt my commitment

She was famous for her witty outrageous remarks.

功能 / 型式	Target	Hinge	Judgment: Normality	Reason
	Noun group	Link verb	Adjective group	Noun group

Carrier	Relational Process: Intensive	Attribute: Normality
She	was	famous for her witty outrageous remarks

由此可知，评价局部语法构型与及物语法构型之间存在部分的兼容性——基于评价范畴的事物属性评价和人的行为/品格的属性评价都与属性关系过程关联，情感评价以及通过人的评价反应做出的事物评价都与情感心理过程关联。另一方面，评价局部语法构型置于评价对象、评价范畴和评价触发项三大要素的评价语境中，更有利于显化具体评价行为的意义建构和词汇语法实现，某种程度上搭建了评价词汇描写与 Halliday 功能语法分析沟通的桥梁。

4.3 聚合—组合关系

系统功能语法从语言整体的聚合系统出发，依据可能的耦合选择，利用语域模型，分析和阐释语篇实例中实际出现的词汇语法组合结构与社会语境的关联。局部语法从特定领域语言使用实例的词汇语法组合体出发，依据词汇和语法结构的共选以及词汇和语法结合而成的型式与意义之间的共选，基于特定局部语法构型的量化描写，阐释特定功能子语言的语言模式与其社会文化语境的关联。显然，二者具有鲜明的互补性，前者采取自上而下的方法，研究维度基本上聚焦于聚合系统层面；后者采取自下而上的方法，研究维度聚焦于组合关系和聚合关系交织的共现语篇和互文语篇层面。如上所述，基于评价理论的态度语义系统，多个关联的评价局部语法得以构建，有利于实现评价子语言描写范围的递增性和内在关联性。另一方面，利用语料库方法，基于相关评价功能成分的组合共选构建的多种局部语法构型，与情感范畴和判断范畴的聚合选择形成有益补充，验证和发展了情感子系统和判断子系统。

5. 结语

评价子语言的研究表明，评价局部语法从话语功能观出发，对显性的评价形式进行了可靠的识别、功能分析和量化描写，进一步验证和发展了评价理论的态度意义系统，显化了评价词汇、评价语法和语篇评价意义之间的内在关联。通过系统比较我们发现，局部语法主张

(C)1994-2022 China Academic Journal Electronic Publishing House. All rights reserved. http://www.cnki.net

组合轴和聚合轴交织的言内语境观、以词汇－型式组合体的局部语法构型为分析工具、聚焦特定功能子语言的共现语篇和互文语篇，系统功能语法提出语域模型、以及物语法构型为分析框架、聚焦语言整体的聚合系统，二者之间存在鲜明的互补性和兼容性。局部语法是语料库语言学范式下发展的功能语法分析方法，由此，语料库语言学和系统功能语言学对话的基础得到了加强，对话的空间得到了扩展，通过计算词汇序列的观察频率与抽象系统范畴的统计概率，可在语言使用的意义研究中进一步实现理论深度和数据宽度的优化整合。

The Philosophical Fuoudation, Linguistic and Political Views of Political Linguistics: From the Perspective of Philosophical Hermeneutics, p. 26. *PENG Wenzhao*

Political linguistics established as a discipline needs to be based on its philosophical foundation. Taking anthropocentrism as its research paradigm, integrating rational epistemology with the empirical methodology as its point of departure, and borrowing the concept of language ontology within philosophical hermeneutics, we have founded the philosophical foundation in the perspective of philosophical hermeneutics for political linguistics and formed the dialogical triads among the subjects, namely human, language and political world. On the basis of the above, this study proposes the linguistic and the political views of political linguistics respectively. The former holds that text-centeredness, theory of meaning construction, and intertextualism together with dialogism should be its ontology, epistemology and methodology, while the latter maintains that discourse-centeredness, theory of discourse construction, and discourse practice should be its ontology, epistemology and methodology. Hence, the theoretical framework and analytic tool of political linguistics are formed, taking political text and political discourse as the center or basic units, adopting text analysis and discourse analysis as the basic methodology, and conducting a descriptive and explanatory study on the covariant relationship between language and politics at both linguistic and political levels. In essence, the political linguistic studies aim to reveal the symbiotic relationship between the offline power and knowledge through online political text and political discourse as well as the symbolized relationship of refraction and mapping in terms of ideology.

Complementarity Between Local Grammar and Systemic Functional Grammar: Focusing on Sublanguage of Evaluation, p. 38. *DONG Min*

With a shared focus on language in use, Systemic Functional Linguistics and Corpus Linguistics have had some kind of dialogue on the notion of context, lexis-grammar inseparability, system-text inseparability and calculation of frequency and probability. This article takes the sublanguage of Evaluation as a focus of study to explore the complementarity between corpus-driven local grammar and Systemic Functional Grammar (SFG) in general. Local grammar is concerned with functionally restricted sublanguage and describes the mapping of functional elements onto pattern elements based on word-pattern combinations identified in a specific or general corpus. It is found that local grammar of Affect and local grammar of Judgment are characteristic of providing reliable identification, functional grammatical analysis and quantitative description of attitudinal inscriptions. Therefore, they give further justification and development of the sub-system of Attitude in Appraisal Theory and complement the evaluative lexis centered approach. In addition, local grammar makes complementary contribution to SFG in general in relation to 1) horizontal and vertical co-text of co-occurrence vs. context of situation, 2) local grammar configuration vs. transitivity grammatical configuration, and 3) sublanguage-specific co-occurring text and inter-text interwoven on both syntagmatic and paradigmatic axes vs. paradigmatic system of language as a whole. A conclusion can thus be drawn that local grammar serves as a bridge for

further dialogue, thus offering more opportunities for their further integration in the study of meaning in use.

Key Words: local grammar; Systemic Functional Grammar; word-pattern combination; local grammar of Affect; local grammar of Judgment; Appraisal Theory

A Tri-dimensional Fractal Model of Semantic Wave: An Interface Study of SFL and LCT, p. 48. *LUO Zaibing, YANG Bingjun & LI Xiaoying*

Semantic Wave is the dialogic focus between Legitimation Code Theory (LCT) and Systemic Functional Linguistics (SFL). LCT defines its semantic gravity and semantic density in terms of specific context, whereas SFL approaches from the textual dimension and proposes the notion of Mass and Presence to remould them as information flow. A close analysis of contextual and textual dimensions of this study shows that Semantic Wave in LCT needs an objective explicit identification criterion to tackle the problem of semantic parameters priority, whereas SFL remoulds them simply at the semantic stratum, demanding adequate affordance of the dynamic semantic profile of Semantic Wave. Thus, the fractal essence of Semantic Wave is identified in the present research as the inherently shared basis for both LCT and SFL and a tri-dimensional fractal model embodying context, semantics and lexico-grammar is constructed out of prioritizing semantic density in elaboration of fractal complexity of Semantic Wave, which may help bring forth an objective explicit identification device and further strengthen the integration between LCT and SFL on semantic wave.

Key Words: Semantic Wave; Legitimation Code Theory; Systemic Functional Linguistics; Lexico-grammar; tri-dimensional fractal model

The Influence of Chinese and English Speakers' Temporal Thinking Patterns on L1 and L2 Processing, p. 61. *YANG Wenxing & WEN Qiufang*

Two experiments were carried out to testify A hypothesis of "Thinking Affects Language Processing" proposed in this study. To be specific, Experiments 1 and 2 focused on the influence of Chinese and English speakers' temporal thinking patterns on their L1 processing and L2 processing respectively. Each participant needed to complete the temporal arrangement task and the priming task. In temporal arrangement task, participants were asked to arrange in order a series of pictures depicting temporal sequences of natural events, aimed to elicit how participants tended to represent time. In the priming task, participants were asked to successively verify a horizontal or vertical nonlinguistic prime and a linguistic target sentence depicting a temporal order. The purpose of the priming task was to measure the effect of the nonlinguistic graphic prime on participants' processing of the linguistic target. Results demonstrate that: 1) The habitual ways of thinking exert profound effects on L1 processing. Both the Chinese and English participants who tended to perceive time in terms of a horizontal axis were faster to verify a temporal target sentence after a horizontal prime than after a vertical prime. Likewise, the Chinese participants who showed salient vertical bias for temporal thinking were faster to verify a temporal target sentence after a vertical prime than after a horizontal prime. 2) The habitual ways of thinking also exert significant influences on L2 processing. Taken together, the findings provide evidence in support of the "Thinking Affects Language Processing" hypothesis.

Key Words: temporal thinking patterns; L1 processing; L2 processing
